

IN THE SPECIFICATION

Page 4, between lines 7 and 8, insert new paragraph:

Fig. 2 shows that there is nothing in between an end of the flatbed glass 20, at a point where the predetermined distance downward to the case 50 is measured, and the side of the opening of the case 50 corresponding to the feeding path. It also shows that an extension line of the upper surface of the flatbed glass 20 and the side of the opening corresponding to the feeding path in the case 50 meet at an acute angle (the angle formed on the lower side of the extension line and to the right of the intersection point).
